Version 2.0.0.0 – October 2010

Enhancements:

1. Portal Adaptors and Environments:

- SharePoint 2010 Adaptor
- SharePoint Tracking Agent - duration events are now fired on page unload

2. CardioLog UI:

- New Reports - OS, External Destinations, Document Versioning
- Custom columns for the Unique Users table report, based on user categories
- Support for date localization in chart dates
- Configurable default value for table/chart height and width
- Chart reports - changed "Aggregated" to "All pages", "Specific" to "Homepage".
- Chart reports - removed the "Specific" series from the default preferences.
- Table reports - show 100 rows by default
- Disable "Export to Excel" in Report Edit Mode for Standard/Professional
- Disable "Re/Generate Report" for Standard/Professional

3. Administration:

- Data Export API - support for filtering by user categories, and setting chart preferences
- Added "Once", "Never" to service scheduling types
- Improved execution for deleting history data
- Improved execution for fixing "lost events"

4. Installer:

- Assign the CardioLog administrator role to the CardioLog Service account

Resolved Issues:

1. Page Views table report - support for 'min count = 0'
2. Reports API helper - cannot change time interval when using the Pro edition
3. Portal Actions report - error on weekly aggregations
4. IIS log import - cannot find logparser path for x64 platforms
5. "Refresh" filters appear for meters in Analysis Center
6. Handle broken browser sessions ids

7. License expired page is displayed even though the activation key is valid
8. Export to Excel fails when data contains invalid characters and formats
9. Missing duration events when switching between browser tabs
10. Delete history data fails for UK date format
11. Portal Tree Updates fails for long URLs
12. Event processing is limited to 10000 events per hour
13. Invalid characters in report title
14. Report Center - Cached values in meters
15. Drill down fails for reports with no AD filter
16. Case sensitive user account names in AD Updates
17. Chart date interval defaults to "hourly" for custom date ranges
18. Disable report drill down from web part
