

SHAREPOINT ANALYTICS GOVERNMENT AGENCIES FACT SHEET

How can government institutions increase efficiency and productivity, promote collaboration, reduce costs, and streamline processes internally, with citizens, and other government agencies? This is the ultimate question the Government has been focusing on.

The need for portal and intranet analytics has become increasingly more obvious as Governments have prioritized digitizing communications internally. Agencies leveraging SharePoint require analytics that can not only increase communication and collaborative efforts, but can constantly assist in developing their intranet efforts to the next level.

CardioLog Analytics is where SharePoint meets analytics. CardioLog Analytics provides a wealth of SharePoint reports available to governments, assisting them in the monitoring of visitors, navigation, content, search, video, and social aspects of the SharePoint portal.

CARDIOLOG ANALYTICS REPORTS

CardioLog Analytics is the only On-Premises SharePoint reporting and analytics solution for Governments. CardioLog Analytics provides rapid ROI and a comprehensive set of SharePoint reporting features that are critical to monitoring SharePoint activity.

BY DEPLOYING CARDIOLOG ANALYTICS, GOVERNMENT AGENCIES ARE ABLE TO:

- ✔ Gain hands on control over all aspects of your SharePoint portal with the on premises offering. All data is stored within the confines of your organization, thereby ensuring privacy and security over your data.
- ✔ Understand a site's social collaboration
- ✔ Track various metrics at once with customized dashboards, fitting the needs of various employees.
- ✔ Drill deep into specific sections or sub sections of your portal to learn what content is performing well, and what needs some extra attention.
- ✔ Integrate with Active Directory and SharePoint User Profiles

KEY FEATURES FOR GOVERNMENT AGENCIES

- ✔ Enjoy Complete Control of Data- On-Premises Solution
- ✔ Enhance collaboration between various federal government departments
- ✔ Monitor and optimize communication flow between users and groups
- ✔ Built specifically for SharePoint, compatible with versions 2016, 2013, 2010, 2007, 2003, and SharePoint Online/Office 365

Compliance - CardioLog Analytics is a SharePoint reporting and analytics solution that has been vetted for its security and consistency. The on premises offering enables compliance with the broadest range of legislation, regulations, and standards.

Control - CardioLog Analytics allows you to enjoy complete control of your data at ease. When you use the analytics tool as an on-premises solution, all data is stored within the confines of your organization. This ensures your data privacy and gives you complete control over all the analytics information that is collected.

Cost-Effectiveness - CardioLog Analytics offers a rapid ROI on your SharePoint portal investment by monitoring your portal activity. Once you gain the insights of what is going on in your portal, you can then optimize your portal so that both administrators and users can get the most out of your SharePoint portal investment.

Choice - CardioLog Analytics integrates seamlessly with SharePoint, intranet and extranet platforms. It offers out of the box support as well as customized APIs for other applications, customizations, CRMs, and workflow platforms such as Nintex.
